Subject: Keynote Speaker Invitation - 8th International mRNA Health Conference

Dear Dr. Fauci,

On behalf of the organizing committee, **I am writing to invite you to Keynote the 8th International mRNA Health Conference** (<http://www.mrna-conference.com/>) to be held at the Boston Park Plaza Hotel on Nov 9-10, 2020.

The International mRNA Health Conference is a yearly non-profit event collaboratively organized by Curevac, BioNTech and Moderna. It brings together academic and industry thought leaders in the mRNA design and delivery space to explore the rapidly evolving science, business and regulatory landscape of mRNA medicines. Over the last seven years, this 2-day conference has become the premier destination for industry and academic professionals to network with colleagues, learn about the latest advances in mRNA technology, and to attend scientific presentations given by the most esteemed experts in the field. Notably, it is the only annual conference dedicated solely to mRNA therapeutics.

As a scientist with tremendous experience and the director of NIAID, the organizing committee thought that conference attendees would very much appreciate hearing about your thoughts about mRNA therapeutics, particularly vaccines, and any perspectives you wish to share.

The organizing committee recognizes that your calendar is likely filled years in advance, but we all have our fingers crossed that you might be able to fit this into your busy schedule.

I look forward to hearing from you.

all best wishes,

Norbert

P.S. In the event that the COVID-19 crisis is still curtailing travel in the fall, our backup plan would be to have a completely virtual meeting on the same dates. We plan to make that decision in late August/early September.

Norbert Pardi, Ph.D.

Dear Tony,

I hope you doing well despite your heroically busy schedule and the complexity and magnitude of the critically important issues you are working so hard and effectively to address. You are providing such amazing and valuable leadership in the response to COVID-19 and the world is so fortunate to have you in this key role!

(b) (4)

Please let me know if you have any questions or would like any additional information. I will keep you posted (b) (4).

Be well and hang in there!

Very best,

Mark

Hi Dr. Fauci,

I am (b) (6) you diagnosed with AIDS back in the mid 1980's. It was in those early days of the AIDS epidemic that you were instrumental in diagnosing and researching this dreadful disease.

(b) (6)

My family had been associated with the NCI through my uncle, Lou Wasserman, who was a researcher for a period of time. Lou did much research on polycythemia vera and was a hemotologist at Mt. Sinai in NYC. I'm glad that he's no longer around to witness the devastation of Covid-19.

I was impressed with your knowledge at the time of (b) (6) diagnosis and I am even more so in these times of the Covid-19 pandemic. Thanks for being the intelligent and informative face of the facts on the virus. There are many around the country who rely on your wisdom but also on your facts and data.

Stay well, stay healthy, and keep providing the country with what we need to know and do.

Best,

Anki Wolf

To: Fauci, Anthony (NIH/NIAID) [E] (b) (6) >
Cc: Emanuele CAPOBIANCO (b) (6) >; GORDON, Bruce Allan (b) (6) >; ROGERS, Paul <(b) (6)>
Subject: Request for your support in promoting new WHO recommendation for emergency response operation to provide universal access to mandatory hand hygiene against COVID-19
Importance: High

Dear Dr. Fauci

Please find enclosed the new WHO recommendation on establishing universal access to hand hygiene stations at thresholds of publicly accessible buildings and means of public transport. It is now officially published at : <https://who.int/who-documents-detail/interim-recommendations-on-obligatory-hand-hygiene-against-transmission-of-covid-19> I attach a pdf copy for easy reference.

I would like to request your support in promoting the recommendation as part of an international emergency response operation providing universal access to mandatory hand hygiene and/or sanitation against COVID-19 infections. Provided it is now made available and made obligatory whenever entering

and leaving a facility to which the general public has access, it could become possible to prevent most smear infections by decontaminating all hands prior *and* after each possible contamination, both active or passive. In addition, the measure should massively reduce transmission of other viruses and bacteria currently burdening differential diagnosis of COVID-pneumonias. Based on the excellent experiences made with the acceptability and adherence during Ebola outbreaks, repeated mandatory hand hygiene or sanitation should thus become an almost unconscious routine of everyday life for any person having to leave his or her private home in Corona-affected countries.

I have been asked by senior WHO emergency management to promote the WHO recommendation for rapid implementation with particular focus on current COVID-19 transmission epicenters such as the USA. Providing a systematic access to hand hygiene stations and making their use obligatory prior to entering and whenever leaving any public facility will also provide a safety net whenever current restrictions on movements and commerce are to be progressively reduced. Given the high resource settings in the current COVID-epicentres, and the negligible cost of implementing this public health emergency measure compared to prolonged mass confinement without safe exit strategy, I do presume that the wherewithal to carry it out will not be limiting factor.

Thank you for considering the collaboration in this emergency measure proposed within the USA at the largest possible scale. WHO has requested IFRC to alert the American Red Cross to support large scale implementation should your Government decide to implement the public health measure proposed.

With best wishes for success in all of your endeavours,

Stefan Hoyer

Subject: RE: GPMB: MESSAGE ON BEHALF OF THE CO-CHAIRS: PROPOSED BOARD TELECONFERENCE - 30 MARCH 15:00 CEST

Dear Board members, dear Colleagues,

Thank you very much to those of you who confirmed your participation in the teleconference on Monday from 15.00-16.00 CET. If you have not done so yet, we would be grateful if you could let us know as soon as possible.

If you cannot attend, the co-Chairs would welcome your written comments in advance of the call.

In preparation for the call, please find attached:

1. Agenda
2. Extraordinary G20 Leaders' Summit Statement on COVID-19 (shared with you earlier)
3. Update on the GPMB urgent COVID-19 funding call from the GPMB COVID-19 sub group
4. Overview of Existing Global Appeals and Funding Mechanisms for COVID-19 (for information)

The call-in details are copied below.

Please note that as several of you have nominated an Alternate to attend on your behalf, the co-chairs will invite Board Members to speak first, followed by Alternates speaking on behalf of Board members.

Given the very limited time, the co-Chairs have asked that keep your interventions as short as possible.

We look forward to the call. Please let us know if you have any questions.

With kind regards,

Ian Smith
GPMB Secretariat

MESSAGE ON BEHALF OF THE GPMB CO-CHAIRS DR BRUNDTLAND AND MR SY

Dear Board Members,

We would like to propose to hold a Board teleconference on **Monday 30 March 2020, 15:00-16:00 CEST time**. The purpose of the call will be to update you on the GPMB's COVID-19 advocacy and to discuss next steps. A more detailed agenda and call-in details will be shared shortly.

We would appreciate if you could confirm your participation to Amélie Rioux (b) (6)

Thank you for your continued support and engagement.

With kind regards,

Gro and As

Subject: Association between Proton Pump Inhibitors and increased risk of Covid-19 death

Dr. Fauci,

There is a wealth of medical research papers about the association between Proton Pump Inhibitors (PPI) and increased risk of community acquired pneumonia. Long term use of PPIs reduce the pH of the stomach from 1 to 5. This reduction in stomach acid reduces the body's ability to fight viruses.

In addition, the lower stomach pH reduce the ability to absorb key nutrients that require gastric acid for breakdown and absorption (calcium, vitamin C & B12, iron, magnesium, potassium, zinc). Lack of proper nutrients lead to a compromised immune system.

Seniors and individuals with chronic illnesses are at higher risk of polypharmacology and dying from Covid-19 due to PPIs. The more medications an individual takes, the more likely they will suffer from acid reflux and thus be prescribed a PPI.

Thank you for your commitment and compassion during the pandemic. God bless you.

Regards,

Teresa McPeak

Subject: RE: Question

David:

Thanks for the note. Since they both effected adequate quarantine, they are OK with each other....provided that they practice physical distancing with everyone else, i.e. 6 feet apart and masks when out in situations where they cannot guarantee 6ft distance. With regard to your second question, it is not a question of temperature, it is a question of what surface the virus in on – stainless steel versus cloth, versus cardboard. Each of these have differ time frames of survival of replication competent virus from a couple of hours to about 2 days.

Best regards,
Tony

> Hi Tony, You probably don't remember me, I was (b) (6) husband back when she was at NIH, you came to dinner at our house once. We also hung out in Boulder and drank beer together. I am just a working class guy, but keep up with science and politics for what it is worth. I don't know what you hear from the street level, but from here in NY we are pretty concerned with the risk of Covid-19 and the Federal response to the pandemic. You have been the only reasonable voice in the administration. The leadership from the top is utterly lacking and incompetent and dangerous to the American people. You have had a long and venerable career and I am asking you to stand up to power and speak the harsh truth to the people of this country and the without regard to your personal consequences. We need a unified and professional federal response to this unprecedented crisis. I think you may be the only person of repute and status that has the power to change the course of history. I have spoken with a good friend of mine who is a respected epidemiologist and he said that Covid-19 will infect half the population of the world and those numbers are frightening statistically. My dad was born during the first worldwide modern pandemic and I don't really want to see him leave from this current one. I know I am somewhat out of place writing to you, but one can only do what one can do to influence the events that history arises from. With utmost respect. Tony Trocchi

On Apr 4, 2020, at 3:38 PM, Stuart Coulter (b) (6) wrote:

Dear Dr. Fauci,

Early Successes in Clinical Trial on COVID-19 Patients with High Dose IV Vitamin C

Thank you for the invaluable work that you are doing in guiding the United States through the current COVID-19 pandemic.

I hope that you do not mind me contacting you, but I wanted to bring your attention to a clinical trial that is currently taking place in China on COVID-19 patients with high dose IV Vitamin C.

There are reports of some early successes with this treatment and I wondered if this could be a possible stop gap treatment - that could possibly save many lives - while we await the development of suitable drug treatments and a reliable vaccine.

The trial in China is not due to conclude until September of this year, however, previous trials of IV Vitamin C have shown it to be a very safe treatment with little or no adverse side effects. I have read that the Northwell Hospital Group in New York, which operates 23 hospitals, have already started to give this treatment to many of their COVID-19 patients.

This treatment also appears to meet the normally required criteria for a clinic trial. The treatment has been shown to be:

- 1) Effective (Please see the link below to the promising trial results currently taking place in China).
- 2) Safe (The treatment has been shown to be safe in many previous trials going back well over 40 years).
- 3) Correct dosage is understood (The dosage is fully understood - please see the attached Protocol).
- 4) The correct patients to give this treatment to (Virtually everyone in hospital infected with COVID-19).
- 5) The correct time in the illness to give the treatment (As soon as the infected patient comes into hospital).

I hope that you and your team find the details of this clinical trial of some interest. The hospital protocol for this treatment is attached and here is a link to details of the current trial in China along with some other relevant links:

Hey Dr. Fauci-

My name is Zach Davis, I'm the founder and editor-in-chief at The Trek, a media company dedicated to long distance backpackers. Thank you for the tremendous service and leadership you've given this country during a time of great need.

I'm reaching out to inquire about the possibility of your doing a short interview for our flagship podcast, Backpacker Radio, the #1 rated hiking podcast on iTunes. We're putting together an episode related to how COVID-19 has impacted this year's class of backpackers, and would love to feature your expert insight on why social distancing is important, and what the future may hold for our community.

The interview would be about 20-25 minutes, though if you're only available for a shorter period, we'll take what we can get!

Thanks for your time and thank you again for your terrific service to this country.

Happy hiking,

--

Zach Davis

Hi Mr. Secretary,

Just wanted to let you know – we had a very productive and significant two-hour virtual meeting with leaders of industry, FDA, and NIH yesterday. I attach the bios of those who attended – which includes the heads of R&D of nine major pharmaceutical companies. There is unanimous support for bringing together all of the sectors to accelerate development of therapeutics and vaccines for COVID-19. Tony compared this to what happened in the early 1990s that led to successful antivirals for HIV.

I attach the action items that came out of this meeting. Working groups for each of the four main topics will be rapidly organized. I will keep you posted.

Best, Francis

Subject: Connection Request per Bill Gates

Tony—I received a note from Trevor and Bill that they connected with you yesterday and they asked me to reach out. I've taken on the role of coordinating the foundation's contributions to the global COVID vaccine efforts, in particular for those approaches that are (or soon will be) in early development. There's an obvious need for coordination among the various primary funders or the focus we need to have given the state of the pandemic will become lost through uncoordinated activities.

Bill tells me that you will take on a central role in coordinating BARDA's funding to the ongoing efforts. And, of course, there are the NIH/VRC activities. I'm reaching out to ask how we can coordinate and cross-inform each other's activities. I am very sensitive to how busy you are and very grateful for your engagement. I see you on TV almost every day, and although you continue to have considerable energy, I am seriously worried about you. The nation and the world absolutely need your leadership.

As a next step we can connect 1:1 briefly or you can pass this on to an appropriate member of your staff.

If you wish, you can always reach out to me directly at any time though my personal mobile at (b) (6)

Please stay well....Emilio

Subject: Heads Up - Dr. Fauci Bobblehead with a Cause

CAUTION: EXTERNAL SENDER

Hi Mary,

I hope you are staying well during these unprecedented times! I wanted to give you a heads up that we will be unveiling a bobblehead of Dr. Anthony Fauci this Friday, April 3rd. Dr. Fauci has become America's voice of reason as one of the lead members of the White House Coronavirus Task Force. The National Bobblehead Hall of Fame and Museum will be donating \$5 from every Dr. Fauci Bobblehead sold to the American Hospital Association in support of the 100 Million Mask Challenge [icm-tracking.meltwater.com]. The bobbleheads will be available for pre-order on our website beginning on Friday.

Bobbleheads are the ultimate honor, and we think Dr. Fauci deserves it given what he has done and continues to do for our country and the world in the battle against COVID-19. The bobblehead will join a growing number of items including donuts, socks and t-shirts featuring Dr. Fauci. We received a lot of requests for a bobblehead of Dr. Fauci and are excited to be able to use the bobblehead to raise funds for a vital organization that is helping limit the spread of the Coronavirus while making people smile during these unprecedented times.

Let me know if you would like the press release, pictures and graphics in advance of Friday's release. Please hold off on publicizing anything related to the bobblehead until Friday—any time on Friday is okay. Please also let me know if you would like a sample when they arrive or if you have any questions.

Thank you,

Phil

Subject: Re: COVID-19 Planning
Importance: High

Colleagues,

The momentum behind a 4th COVID supplement seems to be building in the Congress even more quickly than we had expected. We have received a TA request to provide rough numbers for NIH efforts **by Friday afternoon**. With regrets for adding more burdens to the intense efforts you are already engaged in, I ask that you submit a rough estimate of the first year and the five year budget for your (i) IC-specific initiative(s) and/or your (ii) proposals to contribute to economic recovery, no later than *Friday April 3 at noon*. This will be non-binding, and you are free to revise it for the submission that we already asked you for by Friday COE. The only thing we need Friday at noon is the budget – the narrative can come later in the day (or the night).

Please use the second page of the template we sent you yesterday to provide this draft budget. Send to me.

I apologize for the impossible turn-around and appreciate all the hard work that will be needed to get us this information by the Friday noon deadline.

Many thanks,
Larry

Subject: COVID-19 Planning

Colleagues,

Francis is sending out a note shortly to the co-chairs of each of the ten trans-NIH initiatives, asking for their assistance in putting together workplans and budgets for those projects. But in addition to these trans-NIH activities, we invite ICDs to submit a short description of no more than two IC-specific ideas that you believe merit consideration for support in a fourth supplemental bill, should one be put forward. Please use the same template that is being used for the trans-NIH activities, but just check the appropriate tick box. Your submission should include budget estimates for the first year and subsequent outyears (for a total of 5 years). [REDACTED] (b) (5)
[REDACTED]. Please send these to me by COE, Friday, April 3rd.

Finally, if we are asked about technical assistance regarding economic recovery, please send ideas for that option. As part of this, Mike Lauer and Michael Gottesman will submit estimates on what might be needed for extramural institutions and the IRP to "make them whole". However beyond that there are infrastructure, training, and other requests that would help national economic recovery by creating new jobs (construction, IT, biomedical, etc.) and help prepare the nation for COVID-202X. Please use the same template that will be used for the trans-NIH activities (again, checking the correct box) and include budget estimates for the first year and subsequent outyears (for a total of 5 years). Please send these to me by COE, Friday, April 3rd.

Many thanks,
Larry

Subject: Possible Ineterview via FaceBook

Dear Dr. Anthony S. Fauci,

My name is Brendan Taglianetti; I am a Full-Time Advanced EMT provider for Milford Ambulance Service in Milford, NH. I want to help relay your message of COVID-19 information for state of New Hampshire, by conducting a Facebook Live chat with myself to project information and messages to the citizens of New Hampshire. This is a chance for us to chat for around 10 minutes and talk with a first responder to the general public.

I have seen you do interviews with the media/ daytime talk shows, a Facebook live chat with Mark Zuckerberg, and even an Instagram live video with Stephen Curry from the Golden State Warriors.

I run the social media aspect of the department, and I would love to do a 10-15 minute discussion (with information to the public, as well as some question and answer) with you on Facebook (live) to have the general public watch us talk about the pandemic and the next steps, and also maybe take some questions asked of the public watching when they comment. I also will be reaching out to the New Hampshire State Governor Chris Sununu and Dr. Benjamin P. Chan (who is the state's epidemiologist). I would love to have them chat with me, and have you join in on the discussion as well. I have no confirmed with them if they are available yet, but I am putting things in motion.

I know that if I was able to set up a time and date that would work around your busy and important schedule, then I could with ample time promote it. I would love to not only get the town on Milford to watch this, but have the state of New Hampshire and other states nearby tune in. I know this is a long shot and that you have way more important aspects of your job to complete, but I think this an important time to have the public hear you talk.

Please let me know if this could be possible and I would love to set this up, I don't expect to take too much of your time if this can happen. Sometimes in life you just need to ask and see what happens and this is a time where that risk is worth it to have a conversation with you about this pandemic we are facing, especially as we ramp up for starting to "peak" in the number of people affected.

Please let me know if this is possible and tell me if you are interested in doing this with us for the greater good of the general public to keep them informed.

Sincerely,

Brendan J. Taglianetti

Tony,

Thank you for taking some precious time to hear from some of the folks on the ground confronting COVID-19 around the country. I can't tell you how much we all value your engagement and leadership on behalf of the nation. I'd love to get your take on whether you think the types of things described in the recent AEI report are realistic. I have serious doubts.

Quick question – I mentioned the problem we had with FEMA test kits being recalled from us because we did not want to use their call line and lab because too slow, – just wondering if that came up in your meeting today because I just heard the kits were released to us without restrictions on how we use them. So either way, apparently resolved.

Stay well and best regards,

Jeff

Doughnuts bearing the likeness of Anthony S. Fauci, director of the National Institute of Allergy and Infectious Diseases, rest on a plate at Donuts Delite in Rochester, N.Y., on March 25. (Shawn Dowd/Rochester Democrat & Chronicle/AP)

By

[Antonia Noori Farzan](#)

March 31, 2020 at 5:15 a.m. EDT

Early last week, Nick Semeraro wanted to find a way to honor Anthony S. Fauci. As the owner of a small doughnut shop in Rochester, N.Y., he had been closely tracking the latest news about the [coronavirus](#) pandemic. And night after night, he'd been impressed by how Fauci, the director of the National Institute of Allergy and Infectious Diseases, approached the crisis in a calm, knowledgeable manner.

So, as a tribute, Semeraro put the renowned immunologist's face on a doughnut. Expecting to sell a few hundred, he was shocked when the store [sold out](#) day after day, with [thousands flying off the shelves](#). Donuts Delite was besieged with requests to ship the buttercream-frosted creations all over the country, and one Fauci fan [drove](#) three hours just to pick up a dozen. Soon, bakeries in [Wisconsin](#) and [Pennsylvania](#) followed suit, using edible paper to decorate pastries with Fauci's likeness. "We had no idea it was going to blow up this big," Semeraro told [CNN](#). "We didn't know everyone else felt the same way we did."

While Fauci was already a [respected scientist](#) before the outbreak, his appearances during White House press briefings have made him a household name and an unlikely celebrity. With his

straightforward demeanor and willingness to contradict President Trump, he's begun to develop the same kind of cult following as Supreme Court Justice Ruth Bader Ginsburg and former special counsel Robert S. Mueller III, who inspired countless "Plank like RBG" tank tops and a bizarre illustrated children's book, respectively.

Even as whole swaths of the global economy collapse, the pandemic has created a robust cottage industry of Fauci-themed merchandise, including bottle openers, magnets and mugs. On Etsy, you can buy "Honk for Dr. Fauci" bumper stickers, prayer candles depicting "St. Fauci" and socks printed with Fauci's face. Graphic T-shirts bear slogans such as "I Need a Hero" and "In Dr. Fauci We Trust."

If so inclined, you can even decorate your home with an "I Heart Dr. Fauci" throw pillow, or purchase a replica of Fauci's jersey from the time he captained the basketball team at Manhattan's Regis High School. Lingua Franca, which sells cashmere sweaters embroidered with resistance-friendly slogans for \$380 and up, recently began taking orders for an army-green "Dr. Fauci Fan Club" knit.

In honor of Fauci's Italian heritage, a clam bar in Long Island named a linguine dish after him this week. (Available for pickup only, "the linguine with white clam sauce shares origins with Fauci, as the sauce itself was invented in the Fauci Family's native Sciacca, Italy," the restaurant claimed in a statement.)

As countless Americans remain glued to the news while trying to stay indoors, a robust Fauci fandom has flourished online. On Facebook, the "Dr. Anthony S. Fauci Fan Club" has over 32,000 members. Thousands more congregate in groups with names such as "Dr. Anthony S. Fauci, the Man, the Myth, the Legend," "Dr. Fauci Speaks, We Listen" and "Dr. Fauci Memes for Social Distance Teens."

An unassuming 79-year-old public servant who has advised six presidents, Fauci has become a "reliable constant in a time of uncertainty," The Washington Post's Ellen McCarthy and Ben Terris reported. But his admirers — and there are a lot of them — worry that it's only a matter of time before he's sidelined by Trump.

When Fauci missed a White House news conference earlier this month, panic erupted on Twitter, along with speculation that he could be sick. There was palpable relief when he resumed his regular position at the podium the following day and appeared to hide some exasperation as Trump referenced "the deep state."

Fauci later explained that he had simply been trying to dislodge a lozenge from his throat. But the much-analyzed "Fauci facepalm" had already become a meme, deployed by liberal members of what's known as the resistance.

Fauci's newfound fame can be partially attributed to his willingness to engage with all forms of media — in recent weeks, he's gone on a Barstool Sports podcast, chatted with basketball star Steph Curry on Instagram Live as Barack Obama listened in, and appeared on "The Daily Show With Trevor Noah." But it also undoubtedly helps that his fans tend to take social distancing seriously and consequently have ample spare time to produce fan art or perform songs written (or modified) in his honor.

On social media, Fauci's virtual fan clubs peruse old photos of the infectious disease expert in search of "comfy turtleneck vibes," stitch his face on embroidery hoops and discuss erecting statues as tribute. They frost his name on cookies and joke about constructing shrines in his honor. Prominent activists and entertainers confess to wanting to marry him, or have him tuck them into bed.

Fauci has remained characteristically modest about his new status as a cult figure. "Well, that's very nice," he responded when McCarthy and Terris mentioned that people all over the country were praying for him. Of course, that means that his fan base has only continued to grow.

"I never met a guy that, worldwide, he is so loved," Semeraro, the Rochester doughnut shop owner, told CNN. "And a month ago, we never knew his first and last name."

Subject: Covid-19 comments on UK response

Dear Dr Fauci

I was just re-reading your January 23 Viewpoint article in JAMA. So little time has passed, but so much has changed, and your comments seem prescient.

I have been working on emergent/re-emergent infectious agents for some time, and authored a 2018 report for the UK government on vaccine responses that was summarised in a Vaccine publication last October attached. As almost everyone else, my attention has been redirected to Covid-19, although monkeypox remains a focus of my interest.

You and your colleagues may be interested in two short documents I produced for the UK government on the 20th and 22nd of March. That also seems long ago now!

As fellow citizen of our planet, I thank you and colleagues for your unstinting efforts to control infectious disease and Covid-19 in particular.

Warmest wishes

Karl

Subject: Additional data on masks

Dr. Fauci,

In addition, I found the attachedd review on masks that addresses use in the community settings. Attached are the paper and figure 3, which summarizes the data from 9 very diverse RCTs (overlapping with what I had sent earlier).

Bottom line: generally there were not differences in ILI/URI/or flu rates when masks were used, although when early use and compliance was taken into account, a few times a difference was seen.

In addition:

This case control study noted that, among SARS patients in Hong Kong without a known source of infection, cases (27.9%) were less likely than uninfected controls (58.7%) to report wearing a mask frequently in public, for what that's worth.

Hi Dr. Fauci,

I just wanted to confirm you received this.

I also just read a great story on you in the WSJ, which discussed your amazing basketball and leadership skills when you were in college. Not surprisingly, even then, your teammates were seeking your advice on leading them through difficult times.

Talk to you soon.

Regards,
Arash

Dear Sir

We request you to spare a few minutes to read this email.

Abgenics is a life-sciences company (Abgenics Life sciences Pvt Ltd, www.abgenics.in) based in Pune, India conducting pioneering research in the area of drug discovery using camelid antibody against infectious diseases in the past 10 years. Abgenics Life Sciences was founded in 2010 and is managed by Anil Nahar (Entrepreneur) and Dr Sanjiban K Banerjee (Technical). Dr Banerjee has studied and lived in the USA for more than 7 y and worked in the area of infectious diseases all his life. He has conducted extensive research in the area of camelid antibody technology in USA. After returning to India and with an urge to help the people of India in area of infectious diseases. Dr Banerjee in association with Anil Nahar started this venture. Since then, the company has extensively worked and developed novel camelid antibody technology for various infectious diseases causing bacteria (Multi drug resistant) and fungus like Pseudomonas, Staphylococcus Aureus, Candida Albicans and other

important pathogens. Our company is the only company in India working on Camelid antibody platform. Camelid antibody is a very robust and novel technology and can be used to develop drugs against any kind of antigen generated from bacteria and viruses. The specialty of camel antibody, it occurs in nanosize, high temperature and high Ph stable. It has very high affinity towards any antigen. **A video explaining our technology is attached in the email.**

An Abgenics Life science was awarded twice by [REDACTED] (b) (4)

David:

I know that it is you. I am sorry, but I am getting more than 2000 e-mails pe day. I totally agree with you and this issue is being actively discussed as recently as today at the task Force meeting. I am not sure what you mean by aerial "eradication" procedures that could be practically implemented. There are some data from NIH that indicate that mere speaking without coughing elicits aerosols that travel a foot or two. If that is the case, then perhaps universal wearing of masks in the most practical way to go.

Best regards,
Tony

For God's sake, Tony -- this is me, not simply an unknown "messenger" from the general public! We go back together for many, many years (to our days together at the NIH, remember?). As you may recall, we worked (successfully) during the infamous 1969 "March on Washington", among other historically important events.

Although I am now [REDACTED] (b) (6) I continue to pay careful attention to world events, and this is one that exceeds any others that have occurred in our lifetime!

As I wrote in my previous e-mail, I have become convinced that COVID-19 is behaving as an *airborne virus, and*, therefore, we should be directing our mitigation efforts toward more comprehensive *aerial eradication procedures!*

Think about the most recent reports -- namely that imprisoned inmates, and a young baby, have recently been reported as "infected" with this virus.

Person-to-person infection in these circumstances is difficult to explain! But transmission by viable airborne virus could certainly happen!

I look forward to your response, with best wishes,
David

Subject: Invitation to be the keynote speaker at an Insurance Medicine Conference in Washington, DC in October.

Dear Dr. Fauci,

I hope this email finds you well. It is abundantly obvious from the countless sifts through data and tallies of cases, interviews and press conferences, social media appearances, etc. that your schedule is crazy these days. As a practicing physician and an American, I am proud to be represented by you and thank you for your efforts on our behalf. I realize with your schedule and with the thousands of emails, this one may not make it, but I wanted to take a shot in the dark.

I am currently the Chief Medical Officer of a reinsurer and am on the planning committee for the American Academy of Insurance Medicine's annual meeting which will be held in DC this year October 18-21. Dr. Michael Osterholm had agreed to speak at the conference back in January as our first keynote speaker on the subject of pandemics, preparedness. I'd heard him speak before at Prudential (I was medical director there and we were a member company of CIDRAP) and his talk mirrored his book which I've also read. Regretfully, 2 weeks ago I received notice from Laurel, his EA, that he is unable to attend the meeting because he needs to travel to London that week for a meeting he is heading. I think that a talk on the topic is a must at any medical meeting and after hearing your pressers and coming to rely on your sage status updates and advice, coupled with the fact that the conference is in DC, I thought I'd give this a shot. Would you be AAIM's keynote speaker this year?

In the midst of the current COVID-19 pandemic, we understand many industry conferences have had to be canceled. We are continuing to closely monitor the trend of the COVID-19 virus, and may have to do the same for the AAIM meeting in October, but if there is an opportunity to gather and learn, we'd like to prepare for it.

The audience is medical directors that work in the life, health, disability and longterm care space. Some are clinically active. Some of them are resources for health emergency planning for their companies. The audience comes mostly from North America, although other countries/continents are well represented.

The purpose of the meeting is really to illustrate novel trends in the industry that will likely impact morbidity and mortality in the near or distant future. We've had talks on CRISPR, marijuana, precision medicine, data analytics. They're not hard core morbidity or mortality focused, but do touch on it.

Given the scope of the meeting and the attendees and industries they represent, I think that a lecture on pandemics, bioterrorism and emerging infectious disease, especially in light of COVID-19, is necessary. I think you would teach new concepts to a team of doctors that would identify with some of the system gaps in our current supply chain and their impact on human health, wellbeing and survival. You'd provide experience and insight on what went wrong and what could be fixed in the future to make us collectively better prepared.

We would be honored to have you speak and I'm glad to continue discussion of logistics with someone else on your team. If you needed more information about scope, I can certainly provide that. We do provide an honorarium and will cover travel and hotel expenses.

Thanks so much in advance for any consideration you might give this request/offer and most of all thank you for your direction, demeanor and dedication at this global time of crisis.

Best,
Paulo

Dear Anthony,

I'm an editor at The Times of London. I'm getting in touch to discuss the possibility of interviewing you this week for our Saturday Interview slot next weekend. You have an incredibly tricky role in the fight against coronavirus and have spoken with great clarity. We would love to speak to you about your position and predictions for America.

The interview slot in question is the most prestigious in the weekend edition of The Times - a double-page spread reserved each week for the most influential individuals in public life. Former interviewees range from Boris Johnson to Jeremy Farrar.

We would need 40 - 50 minutes of your time before Friday morning, but preferably by Thursday evening. The interview can be conducted over Skype/Google Hangouts/Zoom or whichever method of video chat you prefer.

We would be delighted if you were to consider our request.

Kind regards
Monique

Subject: **Chloroquine is a thromboxane inhibitor: there is a readily available analog**

Dear Dr. Fauci,

I'm (b) (6) internist.

I have a suggestion for 2 potent antiviral agents, cheap and readily available, that may prevent viral shedding. No viral shedding? No infectivity. The concept is that EVERYONE should take these items.

First a short bio:

Dr. Josh Backon was affiliated with the Hebrew University Faculty of Medicine for over 33 years. He has a good track record (84+ publications quoted by over 750 other researchers in journal articles https://scholar.google.com/scholar?start=0&q=%22backon+j.%22&hl=en&as_sdt=0,5 and in over 250-300 texts as per <https://www.google.com/search?tbo=p&tbm=bks&q=%22backon+j.%22&num=100>).

In the 1980's he was Consulting Editor of the Journal of Pediatric Endocrinology, Editor of Reviews in Pure and Applied Pharmacological Sciences, and Associate Editor of the International Journal of Adolescent Medicine and Health. From 1990-2004, he was a consultant

on emergency planning and management at Israel's National Police Headquarters with Nitzav Mishneh Danny Fisher.

Chloroquine, an antimalarial drug, is now being used to treat Covid-19. Its mechanism was found in the 1970's to inhibit thromboxane
https://scholar.google.com/scholar?hl=en&as_sdt=0%2C5&q=chloroquine+thromboxane&btnG= The problem with chloroquine was that it also elevated levels of prostaglandin F2alpha. In 1980, Srivastava, an Indian biochemist working in Denmark found that GINGER is a potent inhibitor of thromboxane synthetase. I wrote a number of papers in the 1980's on use of ginger:

https://scholar.google.com/scholar?hl=en&as_sdt=0%2C5&q=backon+ginger&btnG=

GINGER IS A POTENT ANTIVIRAL

https://scholar.google.com/scholar?hl=en&as_sdt=0%2C5&q=ginger+antiviral&oq=ginger

THE SECOND ANTIVIRAL AGENT IS TURMERIC [add black pepper since piperine dramatically increases oral bioavailability of turmeric]

https://scholar.google.com/scholar?hl=en&as_sdt=0%2C5&q=turmeric+antiviral&oq=turmeric

Multisite inhibitors for enteric coronavirus: antiviral cationic carbon dots based on curcumin

D Ting, N Dong, L Fang, J Lu, J Bi... - ACS Applied Nano ..., 2018 - ACS Publications
... These results offer theoretical support for the development of CCM-CDs as a hopeful antiviral drug for the treatment of coronavirus infections, including PEDV ... Curcumin (CCM) is a polyphenol compound obtained from turmeric roots...

NAC AND PIPERINE TO INHIBIT INFLAMMATORY CYTOKINES (iNOS, NF KappaB, TNFalpha) INVOLVED IN ARDS

-

Mortality in COVID-19 patients is usually from ARDS (acute respiratory distress syndrome) via inflammatory cytokines. Apart from N-acetylcysteine which was found 3 years ago to elevate atrial natriuretic factor [found by Kiemer in 2001 to zap inflammatory cytokines: iNOS, NF KappaB, and TNFalpha) now piperine in black pepper was found to inhibit inflammatory cytokines [piperine also dramatically increases oral bioavailability of turmeric [which has been used as a potent antiviral]:

Dear Dr. Fauci,

After reading the article about you on the front of the New York Times this morning, I was distressed to learn that you have recently been negatively targeted via social media by members of a certain US political faction. The unfairness of these personal attacks upon you is shocking, and I cannot imagine something so hurtful happening to someone like you who possesses such a depth of knowledge and unimpeachable integrity. You are the affable, truthful and reassuring centre of calm during this deadly coronavirus storm. Your job is difficult enough without people taking verbal pot-shots every time you speak.

I wish you all the best during this trying time. Stay well (and I hope you don't completely lose your voice, too)! I look forward to seeing and hearing more from you on CNN and other media outlets.

Best wishes,
Nancy Hill

Tony, first and foremost.... thank u for ur continued leadership and integrity in the “combat zone”.

I know u r drinking from the proverbial fire hose so I would not send anything ur way if I didn't think it may have merit to address our current challenge with Coronavirus.

I e mail introduced u to this group some time ago. Their science has advanced and in particular there seems to be a potential opportunity to address the sometimes lethal “cytokine storm” in some coronavirus patients as described in the attached e mail.

So I forward to you for your consideration as an adjunct.

On a daily basis I receive numerous “ideas” to address coronavirus from many well intended people. A few have merit. Is there a Fed innovation review group that some of these potential ideas could be funneled too?

I pray for you and your family

Be well

Rich

Hi Dr. Fauci,
I'm looking to do a quick 10 minute phone interview on COVID-19. I've seen your interviews on CNN and they are very informative so I think you would be perfect for our podcast.

This would be for a podcast available to faculty and students at Seneca Media Department in Toronto.

Thanks,

Hey Dr Fauci,

Am wondering if you would be interested in having a chat with us in NZ, over Zoom, as we all sit in our houses fighting Coronavirus

I do a podcast which is normally live streamed but we currently have a country wide lockdown and lots of us have moved our gear home to continue providing content for people who are stuck in their homes

the US is like our big brother, we love you guys and would like to connect in solidarity about COVID19 so I'm hoping that maybe you could find us sometime to have a chat over the internet. Some content would also help us give some more content to Kiwi's who have gotten to the end of Netflix ;)

Find out more about the podcast at www.theDOC.nz and more about me at www.patbrittenden.com/about

Can make anytime happen, fingers crossed we'll hear back from 'someone'.

Subject: COVID-19 aetiology and treatment for critically ill patients: irinotecan+etoposide

Dear Dr. Anthony S Fauci,

This is Idonae, CEO at Demiurge Technologies AG, a Swiss AI-biopharma company making accurate and rapid drug discoveries for diseases with limited available clinical data. We are committed to the non-profit dissemination of our COVID-19 discoveries to the public to facilitate the search for COVID-19 effective treatments.

SARS-CoV-2 is fundamentally different from all the other viruses that the world has hitherto known, so treatments must be rationally designed to avoid fueling the adaptive mutation and the latent infection of SARS-CoV-2.

Demiurge is the world's first company that has discovered the detailed aetiology of COVID-19 that consistently explains the clinical features of COVID-19 and the MoA-based scientific rationale of the candidate treatments for COVID-19

(<https://www.preprints.org/manuscript/202003.0341/v1>).

(b) (4)

Thank you for your consideration and my team is standing by for any further assistance.

Sincerely,
Idonae

Abstract

Summary Background The novel coronavirus (CoV) severe acute respiratory syndrome (SARS)-CoV-2 outbreak started at the end of 2019 in Wuhan, China, and spread over 100 countries. SARS-CoV-2 uses the membrane protein Angiotensin I converting enzyme 2 (ACE2) as a cell entry receptor. Indeed, it was reported that the balance of Renin-Angiotensin System (RAS), regulated by both ACE and ACE2, was altered in COVID-19 patients. It is controversial, however, whether commonly used anti-hypertensive drugs Angiotensin I converting enzyme inhibitor (ACEI) and Angiotensin II receptor blocker (ARB) shall be continued in the confirmed COVID-19 patients. This study was designed to investigate any difference in disease severity between COVID-19 patients with hypertension comorbidity. The included COVID-19 patients used ACEI, ARB, calcium channel blockers (CCB), beta blockers (BB), or thiazide to treat preexisting hypertension prior to the hospital were compared to patients who did not take any of those drugs. **Methods** In this multicentre retrospective study, clinical data of 511 COVID-19 patients were analyzed. Patients were categorized into six sub-groups of hypertension comorbidity based on treatment using one of anti-hypertension drugs (ACEI, ARB, CCB, BB, thiazide), or none. A meta-analysis was performed to evaluate the use of ACEI and ARB associated with pneumonia using published studies. **Findings** Among the elderly (age>65) COVID-19 patients with hypertension comorbidity, the risk of COVID-19-S (severe disease) was significantly decreased in patients who took ARB drugs prior to hospitalization compared to patients who took no drugs (OR=0.343, 95% CI 0.128-0.916, p=0.025). The meta-analysis showed that ARB use has positive effects associated with morbidity and mortality of pneumonia. **Interpretation** Elderly (age>65) COVID-19 patients with hypertension comorbidity who are taking ARB anti-hypertension drugs may be less likely to develop severe lung disease compared to patients who take no anti-hypertension drugs. **Funding** National Natural Science Foundation of China, Chinese Academy of Medical Sciences

Subject: Time-Sensitive OSTP Request - Due 12 pm Monday, March 30
Importance: High

Good afternoon,

We received a time-sensitive request from OSTP that we are asking for your help to complete. Apologies in advance for the short turn-around.

Action – Complete the attached template to provide FOAs and projects on “innovation” and COVID-19, specifically focused on the topics described below. If your ICO has no nothing to report, please let us know.

Requestor – OSTP

POCs and Due Date – Please send the completed template to Elizabeth Walsh (Elizabeth.walsh@nih.gov) by **noon on Monday, March 30**

Timeline –

NIH Receipt Date	Institute Response to OD Due Date	OD Office Review Date	NIH Final Response Due Date
3/28/20	3/30/20	3/30/20	3/30/20

Additional Instructions –

- I pulled all the COVID-19 FOAs from the Guide; however, I did not sort through which ones are relevant to this request. Please submit only those that your IC is the lead on that meet the criteria listed above. Delete any that do not apply.

Attachments –

- Response template (FOAs tab, Grants-Contracts tab)

Do let me know if you have any questions.

Best,

Tara A. Schwetz, PhD

Acting Director, NINR

Associate Deputy Director, NIH

A: Building 1, Room 138

You Can Now Buy Anthony Fauci Swag

T-shirts, mugs, pillows—and, yes, even a Fauci prayer candle.

About Coronavirus 2020

Washingtonian is keeping you up to date on the coronavirus around DC.

[More from Coronavirus 2020](#)

Fauci stans, assemble! **Dr. Anthony Fauci**, director of the National Institute of Allergy and Infectious Disease, has emerged as *the* celebrity of the coronavirus crisis. Like others before him (remember Mueller mania?), his prominence has yielded buttons, t-shirts, and gifts, all flaunting the Fauci.

Fauci face socks

Another reason you won't want to wear your shoes inside. \$9.99, [Etsy](#).

“Dr. Anthony Fauci Fan Club” button

Fauci-fy any look with this pin. \$3.16, [Etsy](#).

“I need a hero” T-shirt

Paying homage to Fauci *and* Bonnie Tyler? This shirt is working overtime. *\$19.99, [Etsy](#).*

“Honk for Dr. Fauci” lawn sign

A social distancing win: Show your support without leaving the house. \$14.95, [Etsy](#).

Fauci Prayer Candle

Praying you washed your hands. \$20.20, [Etsy](#).

“Fauci 2020” T-shirt

Finally, a shirt for those White House coronavirus briefings. \$18, [Etsy](#).

“Hope” sweatshirt

Thanks, Fauci. \$18.99, [Amazon](#).

“Keep calm and wash your hands” mug

A little PSA to go with your morning coffee. \$19.95, [Etsy](#).

Dr. Anthony Fauci T-shirt

A perfectly acceptable day-to-evening look in your self-quarantine. \$29.00, [Esty](#).

“I Heart Dr. Fauci” throw pillow

For sweet, scientific dreams. \$20.66, [Redbubble](#).
