Subject: WH Briefing

Hello Eliseo and Courtney,

During the White House briefing on COVID-19 this evening, there was a discussion on the disproportionate impact of COVID-19 on African Americans, health disparities and data collection. Please see CSPAN Clips below I cued up.

<https://www.c-span.org/video/?c4866877/user-clip-covid-19-african-american-community>

<https://www.c-span.org/video/?c4866892/user-clip-dr-fauci-health-disparities-african-american-community>

<https://www.c-span.org/video/?c4866897/user-clip-data-collection-question-african-american-community>

I know we are not commenting but I would like to recommend that we have some talking points prepared and on hold in case we receive congressional inquiries. These topics are also receiving coverage on the networks.

Thank you,
Natasha

Hi Joe and Maria

I want to share an important update about Lilly's efforts to address insulin affordability. In response to the crisis caused by COVID-19, Lilly is introducing the Lilly Insulin Value Program, allowing anyone with commercial insurance - and those without insurance - to fill their monthly prescription of Lilly insulin for \$35. The program is effective today and

covers most Lilly insulins. Details and more information can be found in the press release here attached.

Lilly has introduced several solutions in recent years to help meet the individual financial circumstances of people living with diabetes that are still in effect during the COVID-19 crisis, including:

- The Lilly Diabetes Solution Center, through which representatives can direct people to the \$35 savings card, as well as affordability options that may reduce their out-of-pocket costs further – such as free insulin for people with minimal income, or no income at all, that has been donated by Lilly to non-profit organizations.
- Three non-branded versions of our insulin options with list prices 50 percent lower than the branded versions.
- In January, the company announced plans to donate at least 200,000 KwikPens® to relief agencies over the next three years.

Hope all is well with you....

Shawn

Subject: Supporting Schools In Covid-19

Dr. Fauci -

I'm a safety/security consultant to independent and charter schools. I run a firm supporting ~1,000 of them. What, if anything, would you want them to know? **I'm wondering if there's any chance in the world you'd be willing to join us and a few hundred schools for a 15 - 30-minute webinar one day next week?**

Specifically, schools are looking for information/perspective as it relates to what to expect as we return to a new normal and the like. Beyond that, they've begun to ask questions such as what we can be thinking about for this short period of time between the return to school and the development of a vaccine. What would best practice look like for us to educate, but maintain social distance? I believe we can manage a lot of the operationalizing but would be immensely grateful for some high-level guidance to follow.

I recognize how incredibly busy this time is for you and would be so incredibly grateful for any time you might be willing to spare for this audience.

With immense gratitude,

Chris Joffe

Subject: NFLPA-NFL Task Force

Hi Courtney,

1st, I hope you, your family and your loved ones are harboring safely through this storm. 2nd, thanks for your efforts and those of Dr. Fauci-he is truly a national treasure during this crisis and it is deeply appreciated.

I appreciate your help and introductions on how our players can be helpful. As you know Drew and Brittany Brees made a \$5M contribution to the Louisiana coronavirus efforts and they have done a lot of press. Drew's message has been "Hang in there-hang tough! We are in this together."

I've done several webinars with our players and their families, both educating them and pointing out their role both with friends and family as well as on social media to let NFL fans know that whether or not we have an NFL season depends to a large extent upon those fans following the guidelines zealously-as zealously as they follow NFL games!

That message seems to be getting through.

I write now with a request for a little bit of Dr. Fauci's time in about 2 weeks. I requested that we stand up a joint NFLPA-NFL Task Force to scenario plan a pathway to getting NFL Club facilities open, with a view towards if and when we might look towards an NFL season, even if games are played with no fans. My request is to have Dr. Fauci give a telephone briefing to our group on this difficult topic, which would of course be confidential. The floor would be his and I can brief him prior to the call on what we have been working on. If he were willing, we can do the call anytime, probably during the week of April 13, although of course the modeling shows that would be during the peak of the outbreak. We could also do it the week before or after.

Thanks so much for considering this. We are mindful of the psychological toll the virus is taking and the lift NFL games would give to a sports-starved population, but only if it can be done safely for the players and the fans who (ultimately) allow them to play this great game.

Again, thanks!

Best,

Doc

To: [REDACTED] (b) (6)

PNAS is pleased to announce that your paper "Projecting hospital utilization during the COVID-19 outbreaks in the United States" has published online at: www.pnas.org. Did you know article-level metrics data and article downloads are now available for all PNAS articles? Article-level metrics provide a new way of measuring the reach and impact of an article by tracking the mentions it receives online. Clicking on the "Authors & Info" tab near the top of each article and scrolling down will reveal a summary of mentions of the article across news sites, blogs, social media, and other online sources- which are visualized in a colorful icon, or "badge." The number in the middle of the badge is the Altmetric score, which is based on the volume, type, and author of the mentions. You can click on the badge or "view more" to explore the individual mentions from each source. Article downloads by month and by article format appear below the badge.

Stay connected to PNAS:

Subject: Hello

Dr. Glass,

I hope you are well and I wanted to check in to see how you are doing in this scary and traumatic time for our world.

During these times, I'm especially thankful for the training I received from the Fogarty Institute. I remember your wise words at our Fogarty orientation in 2011- on why investing in Global health is so critical. No truer words have been spoken especially at times like these!

I'm currently communicating with my former colleagues in Zambia (Mpanji and Innocent pictured here with

me <https://www.thermofisher.com/blog/behindthebench/using-sanger-sequencing-to-detect-drug-resistance-mutations-in-hiv-in-zambia/>) from CIDRZ to see how testing can be brought up via the public health infrastructure in place currently. Thankfully, the number of cases is very low, although the unreported cases are much higher than likely captured

(<https://www.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>). My friend who is a Lieutenant Physician actually likely contracted COVID-19 in January and wrote that she and others had treated a patient returning from Wuhan who was pregnant of respiratory illness upon coming back to Lusaka to deliver, only to die of pleural effusion later. They subsequently developed flu-like symptoms and resolved, but these are the types of cases that likely go undetected and can potentially contribute to community spread of the disease.

Thank you again for being such a wonderful role model, and I look to leaders like you and Dr. Fauci to help our nation think with prudent but difficult decisions.

Kind regards,
Lillian

Why invest in global health ?

- Good for science- the new frontier
- Good for diplomacy - "smart power"
- Good for humanity - correct health disparities
- Good for business & competition
- Good for our war on terrorism
- Good for our own future

...just the right thing to do !

Update. Biggs and Buck are the only 2 members of Congress that voted agn the first two bills dealing with COVID -19. The first vote had only the 2 of them vote no. NRN

Fred:

Thanks for the note. The answer is almost certainly yes, but there would not be enough of them whereby we can compare the results in those who were receiving Hydroxychloroquine or not for their lupus. Large natural history studies, which we will be initiating could possibly answer that question.

Subject: Thank You

Tony,

Thank you for all that you are doing in the fight against COVID-19. Your steady leadership and grounding in the science, and your ability to communicate complex information clearly to policymakers and the public, are what the world needs during this crisis. I know we will see the other side of this pandemic, and you will have once again saved many lives with your work.

I am one step removed from this response, as I am on a detail assignment from FEMA to the Naval Academy, but have been sharing information with the Superintendent and his senior leadership team so that they can make good decisions to protect the community while meeting the Academy's mission. I have thought back to the H1N1 response in 2009-2010 many times since this began.

Again, thank you for what you're doing. My best wishes to you and your family.

Best,
Brian

Subject: ASF: daily data call from Sec Ofc

Per request from the Secretary's office that I sent you this morning, below is what I propose to submit tomorrow morning for the new daily 9am data call. I will plan to submit pretty much the same thing every day. I will not clog your in-box with it unless there is a significant update.

RFI from Staff Sec:

1. For tomorrow's press conference, what information or topics do you recommend be included in the President's remarks? Please provide talking point-level details and support.

Nothing specific from NIAID at this time.

2. For tomorrow's press conference, on what information (if any) do you intend to speak?

Specific topics will depend on questions from reporters. Dr. Fauci has been asked about the effect of social distancing; considerations that would factor into returning the country to normal life; off-label use of treatments such as hydrochloroquine; the status of clinical trials; and the disproportionate impact of COVID-19 on communities of color.

NIAID-specific talking points:

- NIAID has mobilized a rapid research response to quickly develop effective countermeasures for COVID-19, including diagnostics, vaccines to prevent disease and treatments.

- NIAID is supporting a clinical trial of the antiviral remdesivir and is investigating other treatments, including antibody therapies and other antivirals, for their activity against SARS-CoV-2. Well-designed clinical trials are the best way to evaluate potential treatments for safety and efficacy.
- NIAID is supporting an early-stage clinical trial of an investigational vaccine called mRNA-1273, developed by NIAID scientists and the biotechnology company Moderna. The study launched first in Seattle, with a second site recently added in Atlanta. NIAID is researching additional vaccine candidates.
- NIAID has launched a serosurvey study that aims to determine how many adults in the United States without a confirmed history of COVID-19 have antibodies to the virus. Researchers will collect and analyze blood samples from as many as 10,000 adult volunteers without a confirmed history of COVID-19. The results will help illuminate the extent to which the novel coronavirus has spread undetected in the United States and provide insights into which communities and populations are most affected. **[NOTE: This serosurvey is for research purposes. It is not meant to be a way for people to access antibody testing for personal knowledge of prior infection history. If it is portrayed as a way for people to “get tested” to understand their own infection history, we can expect that people will inaccurately blame the government for not receiving results in a timely manner. People can request to learn about their results, which will be available only after weeks or months of analysis.]**
- NIAID is expanding its portfolio of basic research on coronaviruses and emerging pathogens to characterize SARS-CoV-2 (the virus that causes COVID-19) and understand how it causes disease. NIAID also is using animal models to better understand the infection and to investigate optimal ways to treat and prevent COVID-19.

3. Are there topics or announcements for future press conferences (other than tomorrow's) that you would like to flag for the President's speechwriting team?

For HHS to consider mentioning: [REDACTED] (b) (5)

Subject: FW: Staff Sec POC - NIAID

FYI – per request below, HHS is setting up a daily data call. We need to tell them at 9am what you are going to discuss at the daily press conference at the end of the day. My observation is that this may be hard to predict. However, we can certainly come up with some boilerplate talking points that we re-submit every day, emphasizing the importance of properly designed clinical trials as the best way to identify treatments.

Subject: Staff Sec POC - NIAID

Hi Courtney -

I hope you're having a good weekend. Just wanted to touch base because starting tomorrow, we will be receiving requests for information from Staff Sec **each evening** ahead of the next day's press conference - for a turnaround **by 9am the following morning**. Staff Sec is requesting feedback (see the questions below) from task force experts, including Dr. Fauci, on information they recommend be included in the next day's press conference.

Could you please help me identify a primary POC at NIAID that I can work with to get information to Staff Sec?

(b) (5)

Thank you,
Natalie

Importance: High

First thank you all for participating on Wednesday's evening call and producing the briefing memo for the Secretary's review. As a consequence of that meeting and discussion, he fully endorsed the recommendations of the vaccine portfolio you recommended. He, however, expressed, concern about (b) (5)

(b) (5)

(b) (5)

This is an ambitious and challenging undertaking but one driven by the necessity to mitigate the public health, economic and national security threat this virus represents to our citizens, nation and our way of life. The Secretary is confident that together with our private sector partners this is achievable.

Have a restful holiday weekend.

Bob

Subject: #2 – COVID-19 Advisory Panel

When: Wednesday, April 8, 2020 5:15 PM-6:30 PM (UTC-05:00) Eastern Time (US & Canada).

Where: WEBEx - (b) (5)

Presentation for Wednesday. **THIS IS THE UPDATED VERSION** 4:26pm
<< File: BARDA COVID Vaccines White Paper 20200405b.docx >>

Meeting Objective:

- (1) Complete review of BARDA vaccine portfolio (to include related NIH and DoD programs), with emphasis on discussion among Panel members;
- (2) Formulate a recommendation to Secretary Azar to either endorse or modify current vaccine strategy, plans, proposed funding and contracts.

Agenda

Brief review of vaccine programs

- BARDA (deeper dive after Sunday overview)
- NIAID
- DoD

Discussion

Recommendation to Secretary Azar

For convenience, below are the presentation and White Paper from last Sunday evening.

Hi, Dr. Fauci.

Thank you so much for keeping things honest and know that I am such a champion of you.

I hope that reaching out is okay. I work at HHS/IOS team. As I sit here at home and have been thinking about the shortage of medical supplies, doggie cones actually can be used as protection for our health care workers. Just a thought that looks and sounds crazy but can help.

Stay safe.

Kindest Regards,
