Hi Patty,

This reporter hopes to speak with an expert to learn more about NIH's coronavirus vaccine development plan. She specifically wants to know what improvements are being made over the vaccine development program for SARS and other coronaviruses. She has time to speak today until 1:30pm ET. She is available anytime Monday.

This confirms your interview with Dr. Fauci tomorrow between 2:30 pm – 3:00 pm ET.

Please call Videolink at 617-340-4300 to secure the fiber link connection and please reference the NIH ReadyCam Studio when booking it. Please confirm to all cc'd here when you have confirmed with VL.

Also – please send us your control room number name and contact – WE need this for any last minute changes or cancellations. Please know that our schedule has been very fluid and we would need to reconfirm the interview tomorrow morning - please provide the names, emails and numbers for tomorrows staff.

Please provide the exact LIVE HIT time – Dr Fauci will be in the chair 10 minutes prior.

Thank you

Dr. Fauci,

Good morning,

My name is Lori Ann and I'm the senior editor of guests at CNBC. I coordinate for all shows on the network and would like to know if you are available to appear on one of the network shows to discuss the latest on Coronavirus. CNBC U.S. programming is simulcast worldwide so our conversation with you would be of keen interest not only to our U.S. audience but our global viewers as well.

Please let me know. It would be great to have you on.

Best,

Lori Ann

Subject: NIAID intv with Dr. Fauci re coronavirus on Thurs. Jan. 30
Attachments: campus map for drivers.pdf

Hello Patricia,

Dr. Fauci can be available for an on-camera interview in his office at NIH (bldg. 31, rm 7A03) on THURSDAY Jan. 30 at 2:30 p.m. A map with driving instructions is attached. If you provide vehicle info (make model, license plate state and number) and the names of the visitors, I will request a reserved spot for you in the visitors' lot (4A—on the map) across from Bldg 31. Please note, as you know, Dr. Fauci's schedule is extremely fluid. Please reconfirm this scheduled interview with all on this message on Wed. Jan. 29. Thanks.

My name is Lori Ann and I'm the senior editor of guests at CNBC. I coordinate for all shows on the network and would like to know if you are available to appear on one of the network shows to discuss the latest on Coronavirus. CNBC U.S. programming is simulcast worldwide so our conversation with you would be of keen interest not only to our U.S. audience but our global viewers as well.

Please let me know. It would be great to have you on.

Best,
Lori Ann

Subject: Please advise: House Clerk Visit Feb 4 and Senate Clerk Visit Feb 21- Availability Check

Hi Patty,

Please see below for a request for ASF availability for NIH visits by the House Appropriations clerks on Feb. 4 from 11 am – 4 pm and the Senate Appropriations Clerks February 21st from 10 am – 4 pm. Would he be available for these visits?

The proposed topics for each visit are highlighted below.

Thanks very much for your help,
Sara

From: Crews, Donna (NIH/OD) [E] (b)(6)
Sent: Friday, January 24, 2020 1:09 PM
To: NIAID OCGR Leg <NIAIDOCGRLeg@mail.nih.gov>
Cc: Bauer, Jenna (NIH/OD) [E] (b)(6)
Subject: House Clerk Visit Feb 4 and Senate Clerk Visit Feb 21- Availability Check

Good Afternoon All:

In advance of the budget hearings, the House Appropriations Clerks (Jen Cama and Kathryn Salmon) are visiting NIH on **February 4th from 11 am – 4 pm** and the Senate Appropriations Clerks (Laura Friedel, Alex Keenan, and Meghan Mott) are visiting NIH on **February 21st from 10 am – 4 pm**.

As the dates are quickly approaching we are reaching out to ICs for availability during the entire time period. We do not have a draft agenda yet, since we are trying to accommodate all ICs the staff have requested to meet with on those days. Please let us know if Dr. Fauci is available that day and if so what time he is **not** available during 11 am- 4 pm or 10 am – 4 pm time slots.

We are still working on how to fit the topics in and it is possible that we will not be able to get to all the sessions even if the participants are available. Each session would theoretically be approximately 30-45 minutes. More guidance will come after the agendas are finalized.

We need to know his availability ASAP, no later than 12 noon Monday, January 27th.

Topics -

NIAID House update – certainly an update on HIV, flu, antibiotic resistant bacteria, and emerging infectious diseases

NIAID Senate update -- certainly Combating Anti-Resistant Bacteria, Ebola & coronavirus research update. Is NIH coordinating with CDC to develop a diagnostic test and/or vaccine for coronavirus? How can NIH/CDC work together going forward to ensure a better match for next season's flu vaccine? Update on the Ebola vaccines and survivorship given there was a relapse recently in DRC.

Please reply to Jenna and myself.

Thanks,

Donna

Enter the NIH Campus from Rte. 355/Rockville Pike/Wisconsin Ave at NIH Gateway Drive.

Note: you can't make a left turn onto NIH Gateway Drive. If you are coming from DC (driving Northbound on Rte. 355):

1. Continue on Rockville Pike/Wisconsin Ave past South Drive
2. Make a U-turn from the left turn lane at Wilson Drive
3. Continue southbound on Rockville Pike past South Drive
4. Turn right at NIH Gateway Drive
5. You will go through the Gateway Inspection Station and then enter campus on Center Drive. Do not park in MLP 11.

The NIH has implemented security measures to help ensure the safety of our patients, employees, guests and facilities. All visitors must enter through the NIH Gateway Center at Metro or the West Gateway Center. You will be asked to submit to a vehicle or personal inspection. Visitors over 15 years of age must provide a form of government-issued ID such as a driver's license or passport.

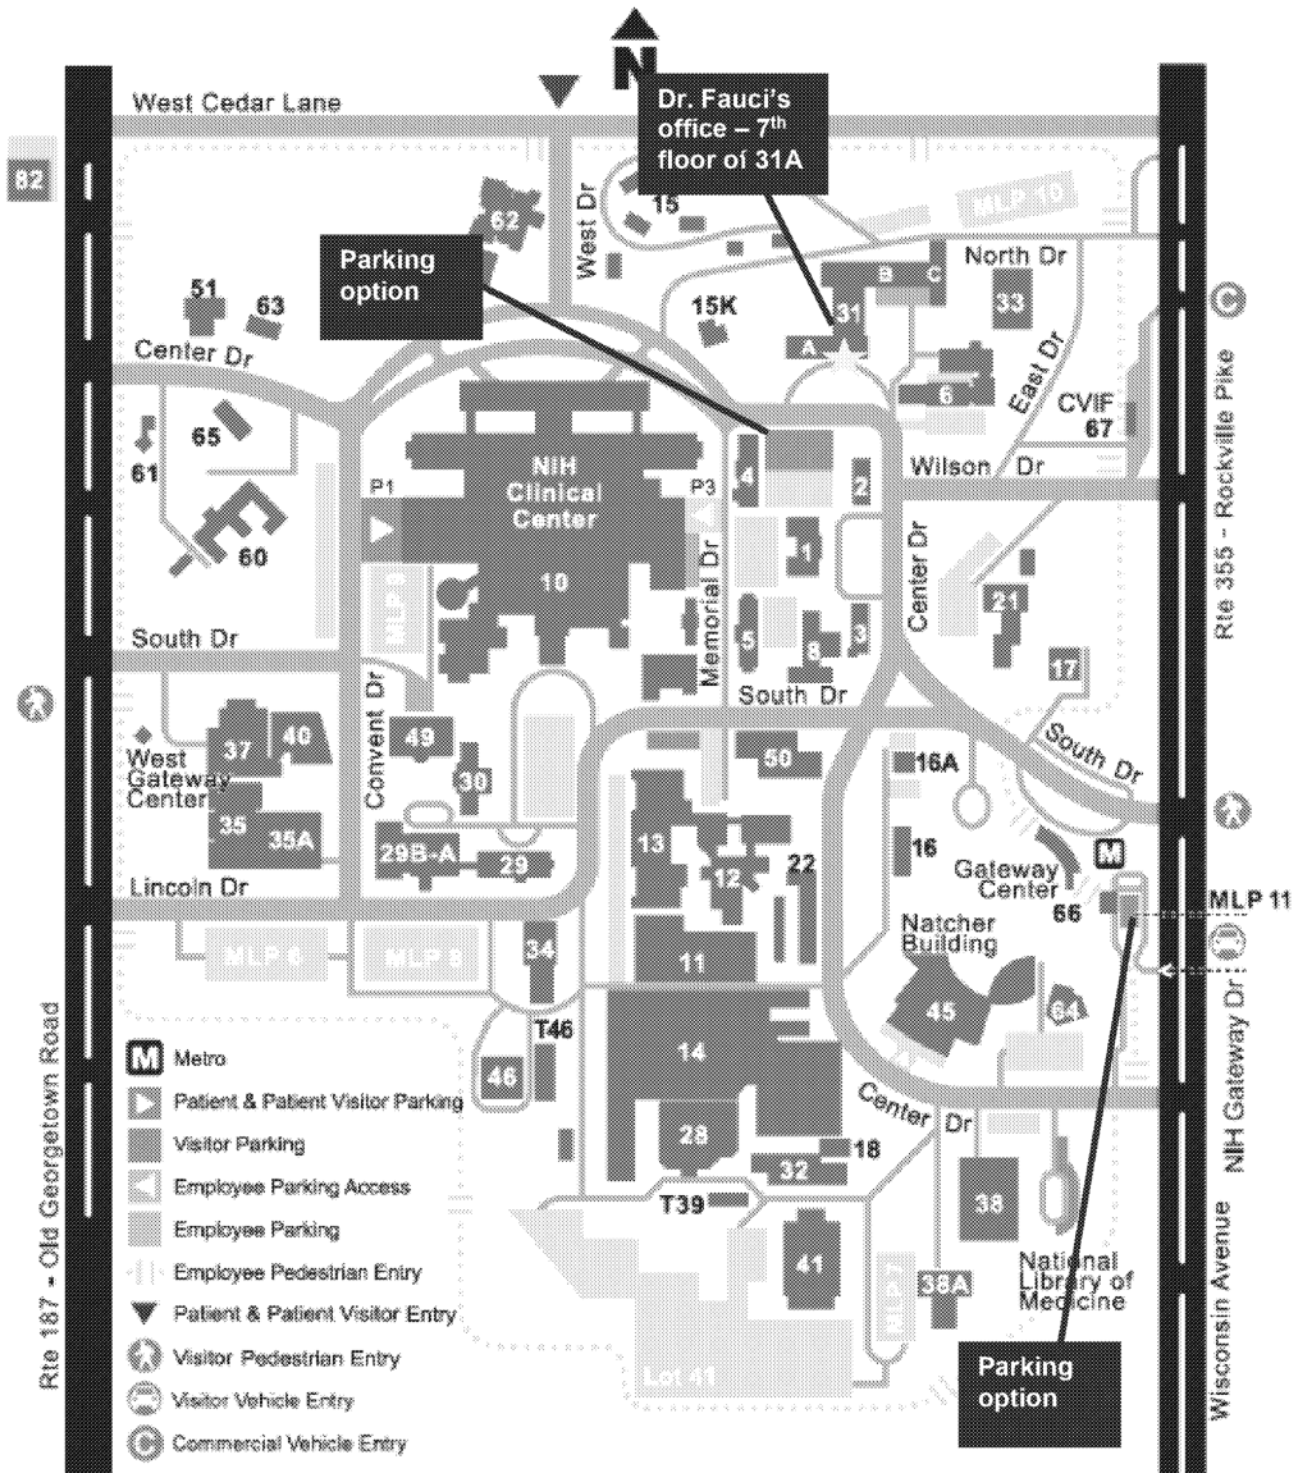

Vehicle Inspections – All vehicles and their contents will be inspected upon entering the campus. Additionally, all vehicles entering certain parking areas will be inspected, regardless of any prior inspection. Drivers will be required to present their driver's license and may be asked to open the trunk and hood. If you are physically unable to perform this function, please inform the inspector and they will assist you.

Vehicle inspection may consist of any combination of the following: Detection Dogs Teams (K-9), Electronic Detection Devices and Manual Inspection.

After inspection, you will be issued a vehicle inspection pass. It must be displayed on your vehicle's dashboard while you are on campus. The inspection pass is not a "parking permit." It only grants your vehicle access to enter the campus. You can only park in designated parking areas.

Personal Inspections – All visitors should be prepared to submit to a personal inspection prior to entering the campus. These inspections may be conducted with a handheld monitoring device, a metal detector and by visible inspection. Additionally, your personal belongings may be inspected and passed through an x-ray machine.

Visitor passes must be prominently displayed at all times while on the NIH campus.

Subject: WHO: Statement on the meeting of the International Health Regulations (2005) Emergency Committee regarding the outbreak of novel coronavirus (2019-nCoV) <http://bit.ly/2RIKRZD>

Statement on the meeting of the International Health Regulations (2005) Emergency Committee regarding the outbreak of novel coronavirus (2019-nCoV)

23 January 2020
Statement
Geneva, Switzerland

The meeting of the Emergency Committee convened by the WHO Director-General under the International Health Regulations (IHR) (2005) regarding the outbreak of novel coronavirus 2019 in the People's Republic of China, with exportations currently reported in the Republic of Korea, Japan, Thailand and Singapore, took place on Wednesday, 22 January 2020, from 12:00 to 16:30 Geneva time (CEST) and on Thursday, 23 January 2020, from 12:00 to 15:10. The Committee's role is to give advice to the Director-General, who makes the final decision on the determination of a Public Health Emergency of International Concern (PHEIC). The Committee also provides public health advice or suggests formal temporary recommendations as appropriate.

Proceedings of the meeting

Members and advisors of the Emergency Committee were convened by teleconference.

The Director-General welcomed the Committee and thanked them for their support. He turned the meeting over to the Chair, Professor Didier Houssin.

Professor Houssin also welcomed the Committee and gave the floor to the Secretariat.

On 22 January, representatives of WHO's legal department and the department of compliance, risk management, and ethics briefed the Committee members on their roles and responsibilities.

Committee members were reminded of their duty of confidentiality and their responsibility to disclose personal, financial, or professional connections that might be seen to constitute a conflict of interest. Each member who was present was surveyed and no conflicts of interest were judged to be relevant to the meeting.

The Chair then reviewed the agenda for the meeting and introduced the presenters.

On 23 January, representatives of the Ministry of Health of the People's Republic of China, Japan, Thailand and the Republic of Korea updated the committee on the situation in their countries. There have been increased numbers of reported cases in China, with 557 confirmed as of today.

Conclusions and Advice

On 22 January, the members of the Emergency Committee expressed divergent views on whether this event constitutes a PHEIC or not. At that time, the advice was that the event did not constitute a PHEIC, but the Committee members agreed on the urgency of the situation and suggested that the Committee should be reconvened in a matter of days to examine the situation further.

After the announcement of new containment measures in Wuhan on 22 January, the Director-General asked the Emergency Committee to reconvene on 23 January to study the information provided by Chinese authorities about the most recent epidemiological evolution and the risk-management measures taken.

Chinese authorities presented new epidemiological information that revealed an increase in the number of cases, of suspected cases, of affected provinces, and the proportion of deaths in currently reported cases of 4% (17 of 557). They reported fourth-generation cases in Wuhan and second-generation cases outside Wuhan, as well as some clusters outside Hubei province. They explained that strong containment measures (closure of public-transportation systems in Wuhan City, as well as other nearby cities). After this presentation, the EC was informed about the evolution in Japan, Republic of Korea, and Thailand, and that one new possible case had been identified in Singapore.

The Committee welcomed the efforts made by China to investigate and contain the current outbreak.

The following elements were considered as critical:

Human-to-human transmission is occurring and a preliminary R0 estimate of 1.4-2.5 was presented. Amplification has occurred in one health care facility. Of confirmed cases, 25% are reported to be severe. The source is still unknown (most likely an animal reservoir) and the extent of human-to-human transmission is still not clear.

Several members considered that it is still too early to declare a PHEIC, given its restrictive and binary nature.

Based on these divergent views, the EC formulates the following advice:

To WHO

The Committee stands ready to be reconvened in approximately ten days' time, or earlier should the Director-General deem it necessary.

The Committee urged to support ongoing efforts through a WHO international multidisciplinary mission, including national experts. The mission would review and support efforts to investigate the animal source of the outbreak, the extent of human-to-human transmission, the screening efforts in other provinces of China, the enhancement of surveillance for severe acute respiratory infections in these regions, and to reinforce containment and mitigation measures. A mission would provide information to the international community to aid in understanding of the situation and its potential public health impact.

WHO should continue to provide all necessary technical and operational support to respond to this outbreak, including with its extensive networks of partners and collaborating institutions, to implement a comprehensive risk communication strategy, and to allow for the advancement of research and scientific developments in relation to this novel coronavirus.

In the face of an evolving epidemiological situation and the restrictive binary nature of declaring a PHEIC or not, WHO should consider a more nuanced system, which would allow an intermediate level of alert. Such a system would better reflect the severity of an outbreak, its impact, and the required measures, and would facilitate improved international coordination, including research efforts for developing medical counter measures.

To the People's Republic of China

- Provide more information on cross-government risk management measures, including crisis management systems at national, provincial, and city levels, and other domestic measures.
- Enhance rational public health measures for containment and mitigation of the current outbreak.
- Enhance surveillance and active case finding across China, particularly during the Chinese New Year celebration.
- Collaborate with WHO and partners to conduct investigations to understand the epidemiology and the evolution of this outbreak, including specific investigations to understand the source of the novel coronavirus, notably the animal reservoir, and animals involved in the zoonotic transmission, as well as the understanding of its full potential for human-to-human transmission, and where transmission is taking place, the clinical features associated with infection, and the required treatment to reduce morbidity and mortality.
- Continue to share full data on all cases with WHO, including genome sequences, and details of any health care worker infections or clusters.
- Conduct exit screening at international airports and ports in the affected provinces, with the aims early detection of symptomatic travelers for further evaluation and treatment, while minimizing interference with international traffic.
- Encourage screening at domestic airports, railway stations, and long-distance bus stations as necessary.

To other countries

It is expected that further international exportation of cases may appear in any country. Thus, all countries should be prepared for containment, including active surveillance, early detection, isolation and case management, contact tracing and prevention of onward spread of 2019-nCoV infection, and to share full data with WHO.

Countries are required to share information with WHO according to the IHR.

Technical advice is available [here](#). Countries should place particular emphasis on reducing human infection, prevention of secondary transmission and international spread and contributing to the international response through multi-sectoral communication and collaboration and active participation in increasing knowledge on the virus and the disease, as well as advancing research. Countries should also follow travel advice from WHO.

To the global community

As this is a new coronavirus, and it has been previously shown that similar coronaviruses required substantial efforts for regular information sharing and research, the global community should continue to demonstrate solidarity and cooperation, in compliance with Article 44 of the IHR (2005), in supporting each other on the identification of the source of this new virus, its full potential for human-to-human transmission, preparedness for potential importation of cases, and research for developing necessary treatment.

The Director-General thanked the Committee for its advice.

Subject: State Dept Travel Advisory -- Level 4: Do not travel to Hubei province, China due to novel coronavirus first identified in Wuhan, China <http://bit.ly/2TSyfx6>

Level 4: Do not travel to Hubei province, China **due to novel coronavirus first identified in Wuhan, China:**

There is an ongoing outbreak of pneumonia first identified in Wuhan, China, caused by a novel (new) coronavirus. In an effort to contain the novel coronavirus, the Chinese authorities have suspended air and rail travel in the area around Wuhan. On January 23, 2020, the Department of State ordered the departure of all non-emergency U.S. personnel and their family members. The U.S. government has limited ability to provide emergency services to U.S. citizens in Hubei province.

Chinese authorities have imposed strict travel restrictions in the area around Wuhan. Travelers should be aware that the Chinese government could prevent them from entering or exiting parts of Hubei province. Travelers should be prepared for travel restrictions to be put into effect with little or no advance notice.

U.S. Centers for Disease Control and Prevention has issued a Warning Level 3 Alert (Avoid Nonessential Travel) due to an ongoing outbreak of respiratory illness caused by a novel (new) coronavirus that can be spread from person to person.

If you must travel to Wuhan, you should:

- Avoid contact with sick people.
- Avoid animals (alive or dead), animal markets, and products that come from animals (such as uncooked meat).
- Wash hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer if soap and water are not available.

- Older adults and travelers with underlying health issues may be at risk for more severe disease and should discuss travel to Wuhan with their healthcare provider.

If you traveled to Wuhan in the last 14 days and feel sick with fever, cough, or difficulty breathing, you should:

- Seek medical care right away. Before you go to a doctor’s office or emergency room, call ahead and tell them about your recent travel and your symptoms.
- Avoid contact with others.
- Not travel while sick.
- Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing.
- Wash hands often with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer if soap and water are not available.

Please see <https://wwwnc.cdc.gov/travel/notices/watch/novel-coronavirus-china> and <https://www.cdc.gov/coronavirus/novel-coronavirus-2019.html> for further updates.

Exercise increased caution in China due to arbitrary enforcement of local laws and special restrictions on dual U.S.-Chinese citizens:

The Chinese government has asserted broad authority to prohibit U.S. citizens from leaving China by using “exit bans,” sometimes keeping U.S. citizens in China for years. The Chinese government uses exit bans coercively:

- to compel U.S. citizens to participate in Chinese government investigations,
- to lure individuals back to China from abroad, and
- to aid Chinese authorities in resolving civil disputes in favor of Chinese parties.

In most cases, U.S. citizens only become aware of the exit ban when they attempt to depart China, and there is no method to find out how long the ban may continue. U.S. citizens under exit bans have been harassed and threatened.

U.S. citizens may be detained without access to U.S. consular services or information about their alleged crime. U.S. citizens may be subjected to prolonged interrogations and extended detention for reasons related to “state security.” Security personnel may detain and/or deport U.S. citizens for sending private electronic messages critical of the Chinese government.

Extra security measures, such as security checks and increased levels of police presence, are common in the Xinjiang Uighur and Tibet Autonomous Regions. Authorities may impose curfews and travel restrictions on short notice.

The Chinese government does not recognize dual nationality. U.S.-Chinese citizens and U.S. citizens of Chinese heritage may be subject to additional scrutiny and harassment, and the Chinese government may prevent the U.S. Embassy from providing consular services. Read the Safety and Security section on the [country information page](#).

If you decide to travel to China:

- Enter China on your U.S. passport with a valid Chinese visa and keep it with you.
- If you are arrested or detained, ask police or prison officials to notify the U.S. Embassy or the nearest consulate immediately.
- If you plan to enter North Korea, read the [North Korea Travel Advisory](#).
- Enroll in the [Smart Traveler Enrollment Program \(STEP\)](#) to receive Alerts and make it easier to locate you in an emergency.
- Follow the Department of State on [Facebook](#) and [Twitter](#). Follow the U.S. Embassy on [Twitter](#), [WeChat](#), and [Weibo](#).
- Review the [Crime and Safety Reports](#) for China.
- Prepare a contingency plan for emergency situations. Review the [Traveler’s Checklist](#).

Last Update: Reissued with updates to the Travel Advisory Level: Level 4 for Hubei province.

Rep. Greg Walden ✓
@repgregwalden

Getting briefed on the #Coronavirus outbreak. So far only 5 cases in the U.S. & no human-to-human transmission here. But nearly 8,000 cases in 31 provinces in China w/ human-to-human transmission occurring. @NIH is working on a vaccine, but at best that will take a year.

Subject: NIH team going to China?

Hi Renate. Just wanted to quickly run something by you-- at least one lawmaker said today that CDC and NIH got the green light from the Chinese government to travel there and work with Chinese authorities, and they'll be heading there "soon."

Is that accurate? Or is there some confusion over who is actually going, because WHO is sending a team.

Subject: Canceled: FY 2020 Personnel Review - DEA
Location: 31/7A18

Start: 1/31/2020 8:30:00 PM
End: 1/31/2020 9:00:00 PM
Show Time As: Free

Required Attendees: Fenton, Matthew (NIH/NIAID) [E]; Old, Susan (NIH/NIAID) [E]; Gehlhaus, Kristie (NIH/NIAID) [E]; Brewer, Teresa (NIH/NIAID) [E]; Hazell, Kimberly (NIH/NIAID) [E]; Auchincloss, Hugh (NIH/NIAID) [E]; McGowan, John J. (NIH/NIAID) [E]; Harper, Jill (NIH/NIAID) [E]
Optional Attendees: Gorham, Vanessa (NIH/NIAID) [E]; Robinson, Whitney (NIH/NIAID) [C]; Fowler, Karen (NIH/NIAID) [C]; Sullivan, Fantasia (NIH/NIAID) [C]

Due to the evolving Coronavirus epidemic we need to cancel the Personnel Review meeting scheduled for tomorrow. I will be in touch at a later date to reschedule.

Thank you,
Kim Barasch
