Emotional wellness is the ability to successfully handle life’s stresses and adapt to change and difficult times. Here are tips for improving your emotional health:

**GET QUALITY SLEEP**

To fit in everything we want to do in our day, we often sacrifice sleep. But sleep affects both mental and physical health. It’s vital to your well-being. When you’re tired, you can’t function at your best. Sleep helps you think more clearly, have quicker reflexes and focus better. Take steps to make sure you regularly get a good night’s sleep.

**TO GET BETTER QUALITY SLEEP:**

- Go to bed the same time each night and wake up the same time each morning.
- Sleep in a dark, quiet, comfortable environment.
- Exercise daily (but not right before bedtime).
- Limit the use of electronics before bed.
- Relax before bedtime. Try a warm bath or reading.
- Avoid alcohol and large meals before bedtime. And avoid stimulants like nicotine and caffeine.
- Don’t take naps after mid-afternoon. Keep naps short.
- Try to get natural sunlight for at least 30 minutes a day.
- See a health care professional for ongoing sleep problems.
