WHITE HOUSE ANNOUNCES 2006 AWARDS FOR EARLY CAREER SCIENTISTS AND ENGINEERS

WASHINGTON – The White House today will announce the recipients of the 2006 Presidential Early Career Awards for Scientists and Engineers, the Nation’s highest honor for professionals at the outset of their independent scientific research careers. Fifty-six researchers will be honored today in a ceremony presided over by John H. Marburger III, Science Advisor to the President and Director of the White House Office of Science and Technology Policy. Two awardees were unable to attend.

The Presidential Early Career Awards for Scientists and Engineers, established in 1996, honors the most promising researchers in the Nation within their fields. Nine federal departments and agencies annually nominate scientists and engineers who are at the start of their independent careers and whose work shows exceptional promise for leadership at the frontiers of scientific knowledge. Participating agencies award these talented scientists and engineers with up to five years of funding to further their research in support of critical government missions.
